MD60

MD60

Open MD60 applicator is a new concept tool to dispense and apply pre-printed labels, barcode labels and non-rectangular labels, like circles, ovals, and other label shapes.

Size detecting system is able to recognize different label sizes: further adjustments are not required, just load label rolls and the tool is ready to work.

No feed slots are required: only a small 2mm gap is required between labels.

An ergonomic and robust design allows easy working conditions and real labour cost saving.

label width	from 20 mm to 60 mm
label length	single trigger pull: min 25 mm - max 63 mm
	additional pulls: no limits
roll internal diameter	25 mm - 40 mm with adapter
roll external diameter	max 100 mm
label shape	rectangular - round - oval

Adjustable size detecting system is able to recognize different label shapes.

Dynamic

Typical sensor positions, according to the shape of label.
